The male/female issue keeps changing. As I told [Redacted] earlier today, the JAG Commander advised that she did not believe that the recent General Order was meant to apply to a situation like ours. My unsolicited input, it would be extremely difficult to have a male and a female in the BAU hooch. Numerous obvious problems such as bathroom issues, relaxation dress issues, etc. Enough of that.

SSA [Redacted] was advised of the above and asked to provide guidance to us as the DHS wanted us to be a part of one of the interrogation teams. [Redacted] said as long as there was no "torture" involved that we were within our guidelines. He actually encouraged us to be a part of this as we would be able to provide FBIHQ with 'updates' of what was happening. As it stands right now, we will attend a meeting tomorrow morning at Delta to further discuss this scenario.

I'll continue to advise as appropriate
